# About LOSiam

## Who We Are

**Le Laboratoire Olfactif du Siam**
*Chiang Mai, Northern Thailand*

LOSiam is an artisanal extraction laboratory dedicated to one of the world's most botanically rich and underexplored fragrance territories: Northern Thailand.

Founded in 2022 and rooted in two decades of extraction expertise, we operate from CMU Biopolis in Chiang Mai, at the crossroads of Lanna botanical tradition and advanced green chemistry. Our mission is to bring the aromatic signature of this region into the palette of perfumers who demand both quality and provenance.

Every material in our collection begins in the field. We work exclusively with a network of over 30 local farming partners, sourcing hand-harvested botanicals at fair, agreed prices and processing them within hours of collection. This farm-to-flask discipline, from the sacred White Lotus gathered at dawn to the Chalood bark long used in Lanna incense and ceremony, is what makes our extracts both aromatic and irreplaceable.

Our process blends French fragrance heritage with solventless and green extraction technologies, producing premium absolutes and concretes that meet the highest international standards. Our products are IFRA compliant, allergen tested, and produced in full respect of the Nagoya Protocol.

Several materials in our catalogue exist nowhere else in commercial supply. We consider that a responsibility as much as a distinction.

LOSiam is more than a supplier. It is a laboratory, a territory, and a commitment to the art of natural fragrance.

## What we offer

*Several of our materials exist nowhere else in commercial fragrance supply. Rarity is a botanical reality.*

**Classic products**
A curated range of absolutes and concretes, available year-round or per seasonal stock.

**Contract extraction**
Made to order, post R&D validation.
Your raw material, our expertise

**R&D services**
Bespoke extraction projects. No MOQ.
2–3 weeks turnaround.

LOSIAM CO. LTD

# The Three Collections

## One territory, read three ways.

Each collection follows a single idea, and each names the one material that breaks it. The exceptions are deliberate: they are where one collection opens onto the next.

**HOW TO USE**
2 g pure extract per material
Dilute to 20% (10 g of solution)
Start creating with LOSiam's fragrant bases

COLLECTION I

## Lanna

*Roots, Dust & Time*

Materials that time has already worked on: cured, fermented, macerated, dried.

Ya Dong Accord · Old Teak Sawdust CO2 · Jungle Pepper (Dry) · Miang · Tobacco (Virginia)

THE EXCEPTION Jungle Pepper (Dry)

page 4 →

COLLECTION II

## Jungle

*Citrus, Green & Bright*

Materials extracted close to the picking, while the brightness is still in them.

Jungle Pepper (Fresh) · Aromatic Litsea $CO_2$ · Lemmon Marigold · Mandarin peels upcycled · Chalood

THE EXCEPTION Aromatic Litsea $CO_2$

page 5 →

COLLECTION III

## Thai Gourmand

*Caramel, Roasted, Warm*

The gestures of the Thai kitchen, from the stove to the extractor.

Fresh Pandan 30% · Roasted Coconut · Anaerobic Coffee $CO_2$ · Chalood · Upcycled Makiang 20%

THE EXCEPTION Chalood

page 6 →

LABORATOIRE OLFACTIF DU SIAM
LOSIAM CO. LTD

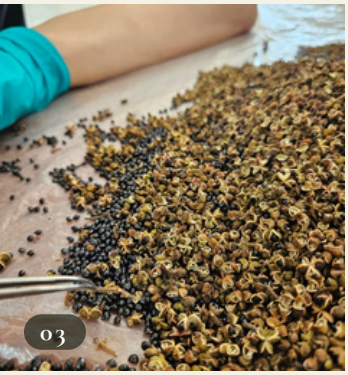

# The Lanna Collection

COLLECTION #I

## THE IDEA

In the North, nothing is used fresh that can be kept. Leaves are cured, tea is left to ferment, roots steep for months in rice spirit, sawdust settles for decades in the corner of a mill. Lanna gathers the materials that time has already worked on before they reach the laboratory.

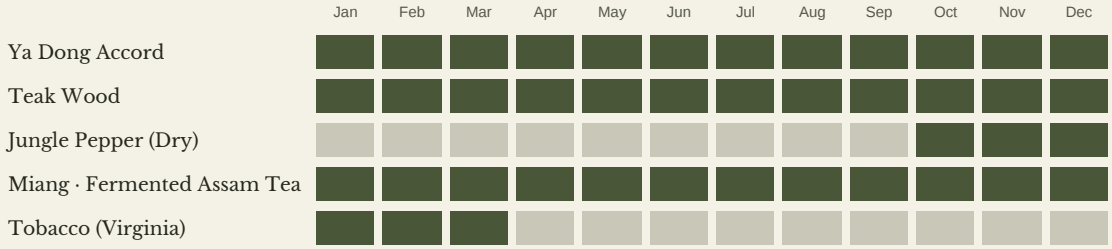

Dry woods, cured leaf, dark fruit and a medicinal warmth.

## THE MATERIAL

| NO | PRODUCT · BOTANICAL NAME | OLFACTORY FAMILY | HARVEST | AVL |
|---|---|---|---|---|
| 01 | **Ya Dong Accord**<br>*Thai herbal blend* | Medicinal · Camphorous · Deep Wood | All Year | ● |
| 02 | **Old Teak Sawdust CO2**<br>*Tectona grandis* | Deep Wood · Dust | All Year | ● |
| 03 | **Jungle Pepper (Dry)**<br>*Zanthoxylum myriacanthum* | Spicy · Fruity · Coniferous | Oct–Dec | ● |
| 04 | **Miang · Fermented Assam Tea**<br>*Camellia sinensis var. assamica* | Animalic · Tobacco · Apricot | All Year | ● |

● In stock ● Seasonal

## Harvest Calendar

**DISCOVERY KIT: All five materials, 5 × 2 g pure absolute in amber bottles. Each is also available separately from the catalogue.**

THE EXCEPTION

### Jungle Pepper (Dry)

A forest fruit among leaves, roots and wood. It earns its place by drying: the same Ma Khaen berry, picked fresh, opens the Jungle collection.

LABORATOIRE OLFACTIF DU SIAM
LOSIAM CO. LTD

# The Jungle Collection

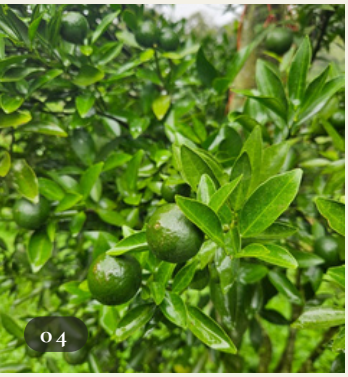

COLLECTION #II

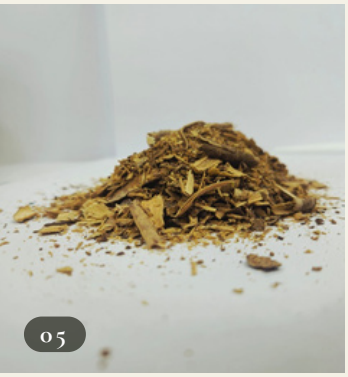

## THE IDEA

Above Chiang Mai the forest smells sharp: split peel, green berries on the branch, flowering weeds along the tea rows. Jungle keeps the materials that are extracted close to the picking, while that brightness is still in them.

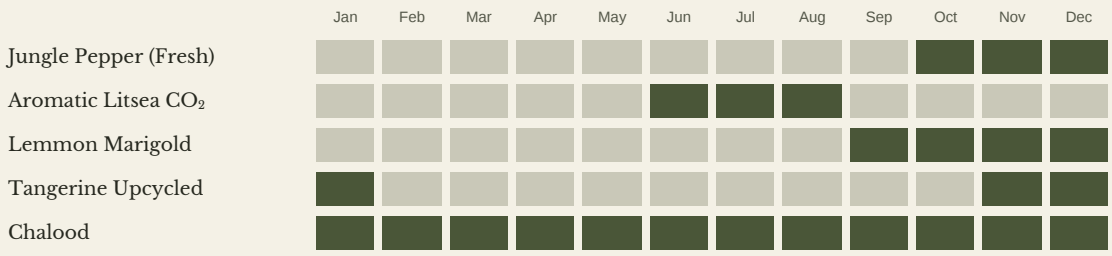

*Zest, aldehydic green, crushed leaf and a thread of smoke.*

## THE MATERIAL

| NO | PRODUCT · BOTANICAL NAME | OLFACTORY FAMILY | HARVEST | AVL |
|---|---|---|---|---|
| 01 | **Jungle Pepper (Fresh)**<br>*Zanthoxylum myriacanthum* | Aldehydic · Green · Floral | Oct–Dec | ● |

## Harvest Calendar

DISCOVERY KIT: All five materials, 5 × 2 g pure absolute in amber bottles. Each is also available separately from the catalogue.

THE EXCEPTION

### Aromatic Litsea $CO_2$

The citrus that ends in embers. Villagers roast the fruit before it reaches us, and its leathery, smoky dry-down points toward the darker register of Lanna.

LABORATOIRE OLFACTIF DU SIAM
LOSIAM CO., LTD

# The Thai Gourmand

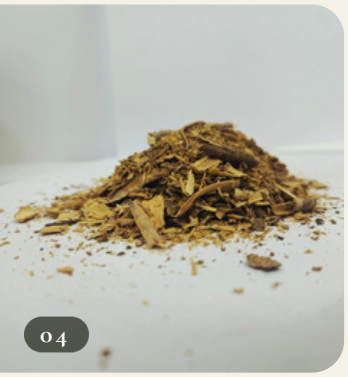

COLLECTION #III

## THE IDEA

The Thai kitchen perfumes with heat. Coconut is toasted until it turns to candy, coffee is roasted after a slow anaerobic rest, fruit pulp is cooked down to its sugar. Thai Gourmand follows those gestures from the stove to the extractor.

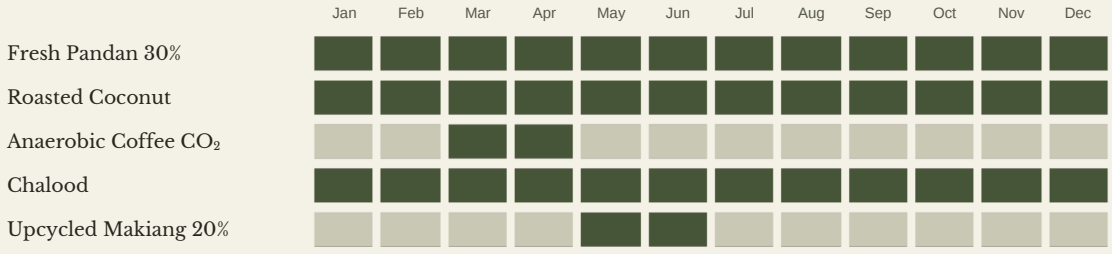

Caramel, roasted bean, warm rice and almond powder.

## THE MATERIAL

| NO | PRODUCT · BOTANICAL NAME | OLFACTORY FAMILY | HARVEST | AVL |
|---|---|---|---|---|
| 01 | **Fresh Pandan 30%**<br>*Pandanus amaryllifolius* | Gourmand · Cereal · Green | All Year | ● |

# ANAEROBIC COFFEE CO2

*Coffea arabica*

**ABSOLUTE**

## Extract parts

Roasted beans (anaerobic-fermented, omni-roast)

## Olfactory family

Gourmand | Roasted

## Process

Solvent | **Solventless SFE** | Green Solvent | Enfleurage

## Description

An ultra-realistic, powerful extraction of **freshly roasted coffee.** The anaerobic process unveils a complex **bitter-sweet profile** with **dark chocolate** and d**ried fruit facets**. It maintains a **woody structure** throughout, accented by a refined **gourmand trail.**

## Usage Note

Arabica coffee is popularly grown in **high-altitude areas** like the northern part of Thailand. It is the type of coffee used in most coffee shops, especially premium coffee shops that sell "specialty coffee" or Arabica coffee that has been carefully produced from **planting to processing, roasting, and brewing**. Chiang Mai is one of the sources of high quality coffee in Thailand. Therefore, we choose to use **Arabica coffee beans from Chiang Mai.**

# AROMATIC LITSEA CO2

*Litsea Cubeba*

**ABSOLUTE**

**IFRA ✓**

## Extract parts

Roasted fruits

## Olfactory family

Citrus | Leathery | Aromatic

## Process

Solvent | **Solventless SFE** | Green Solvent | Enfleurage

## Description

A sophisticated evolution of the classic citrus profile — the piece in Jungle Collection that carries an **ember**. It opens with a **vibrant, citrusy-fresh** top note reminiscent of citronella, swiftly transitioning into a complex heart of **rosé geranium** and **spicy nutmeg**. Where its Jungle neighbors stay green and bright, Litsea's dry-down breaks rank: a clean **leathery accord** with **smoky, wood-fire undertones** and a peculiar candied ginger warmth — a citrus that ends in embers, bridging toward Lanna's darker register.

## Local Usage Note

**Ta Krai Ton** is a plant that produces fruit **only once a year.** Hill tribes in Thailand commonly use the fruit as a **spice in cooking or eating** it with Laap (a spicy minced meat salad) to neutralize the gamey smell. We purchased the produce **from villagers in the mountains of Chiang Mai** that have **a roasting pre-treatment** which gives it this unique roasted and smokey scent.

# CHALOOD
*Alyxia reinwardtii Blume*

**ABSOLUTE**

**IFRA ✓**

## Extract parts

Bark

## Olfactory family

Coumarinic | Gourmand | Spicy

## Process

Solvent | Solventless SFE | **Green Solvent** | Enfleurage

## Description

Often referred to as "**White Cinnamon**", this absolute offers a **comforting**, **balsamic sweetness**. It features a unique profile of **toasted woods** and **almond powder**, layered with **tonka bean** and **gingerbread** nuances. A subtly lactonic quality provides a "cloudlike" softness without weight, finishing with a mellow, **spicy musk**.

## Usage Note

Chalood is a fragrant bark traditionally harvested in Northern Thailand. Valued in Lanna culture for its **warm, woody-spicy aroma**, it is used in i**ncense, herbal remedies,** and h**ousehold rituals** to bring **calm and harmony.** Today, its subtle sweetness continues to inspire **perfumery and wellness traditions.**

# Fermented Assam tea leaves (Miang)

*Camellia sinensis var. assamica*

**ABSOLUTE**

**EXCLUSIVE**

## Extract parts

Fermented leaves

## Olfactory family

Animalic | Tobacco | Osmanthus

## Process

**Solvent** | Solventless SFE | Green Solvent | Enfleurage

## Description

Deep, **animalic warmth** in tension with a **burnt-leather edge** — a rare pairing — rounded by real **undergrowth depth** and a surprising **apricot softness** that keeps it from tipping into darkness.

## Usage Note

Fermented Assam tea leaves traditionally chewed as a mild stimulant across Northern Thai and Shan communities — a living fermentation practice tied to Lanna social ritual and forest agriculture.

# FRESH PANDAN 30%

*Pandanus amaryllifolius*

**ABSOLUTE**

**R&D**

## Extract parts

Fresh Leaves

## Olfactory family

Gourmand | Cereal | Green

## Process

Solvent | Solventless SFE | **Green Solvent** | Enfleurage

## Description

The scent is defined by an immediate **basmati rice** and **freshly popped corn aroma**. It possesses a **creamy, nutty heart** that feels "green", with a strong note of **freshly squeezed sugar cane**. There are subtle **toasted hay facets** and a **velvety, leafy undertone** that provides an almost cooling sensation.

## Usage Note

Pandan is widely cherished in Thai and Southeast Asian culinary traditions. Its fresh leaves are used to **infuse desserts**, **rice,** and **drinks** with their distinct aroma. Traditionally folded and simmered in coconut milk, pandan **brings both sweetness and green freshness**. Our absolute is extracted from **freshly harvested leaves** to preserve this natural balance, offering perfumers a rich and authentic interpretation of pandan.

# JUNGLE PEPPER DRY
*Zanthoxylum myriacanthum*

**ABSOLUTE**

## Extract parts

Sun-dried fruits

## Olfactory family

Spicy | Fruity | Coniferous

## Process

**Solvent** | Solventless SFE | Green Solvent | Enfleurage

## Description

A textural and diffusive **spice note**. It is defined by a **peppery bite** and a **rich, jammy heart of dried figs**, **prunes**, and **dates**. This sweetness is balanced by a dry, **balsamic backbone** and the **resinous**, terpene-rich effect of fir balsam, finished with a **delicate violet shimmer.**

## Usage Note

Ma Khaen is commonly found in the **northern provinces of Nan, Chiang Rai, Mae Hong Son, and Chiang Mai.** The fruits can be harvested **once a year**, which is why Lanna people often **dry them to preserve for year-round use**. Ma Khaen is a popular ingredient in many **traditional Lanna dishes**, particularly Laap (a spicy minced meat salad).

# OLD TEAK SAWDUST CO2

*TECTONA GRANDIS*

**ABSOLUTE**

**EXCLUSIVE**

## Extract parts

Upcycled sawdust

## Olfactory family

Deep | Wood | Dust

## Process

Solvent | Solventless SFE | **Green Solvent** | Enfleurage

## Description

Old Teak Sawdust is a **warm**, **dusty** extract reclaimed from sawmill waste in Northern Thailand. It opens with a **sharp mineral** quality, like fine wood dust suspended in still air. The heart carries a dry, **pencil-shaving** woodiness layered over the deeper impression of **ancient, aged wood**, with a real pull toward damp forest-floor undergrowth. A **green olive facet** runs underneath, adding a bitter, oily green contrast. Altogether, it recalls the smell of a workshop at dusk, standing at the edge of the forest.

## Usage Note

Teak is one of Thailand's most **valued woods**, and since the country's 1989 ban on logging in natural forests, virtually all commercial teak comes from **managed forestry plantations** rather than wild forest. Every time a plank is cut, sawdust falls to the ground and is typically burned or discarded. Old Teak Sawdust is sourced directly **from sawmills** working with aged, reclaimed teak, transforming this overlooked byproduct into an exceptional botanical extract.

**ABSOLUTE**

**IFRA ✓**

## Extract parts

Roasted Pulp

## Olfactory family

Gourmand | Nutty

## Process

**Solvent** | Solventless SFE | Green Solvent | Enfleurage

## Description

Far from a synthetic suntan oil, this is a **sophisticated toasted coconut** with a **bakery-style soul**. It is exceptionally **creamy and buttery**, featuring **nuances of warm rum and dark caramel**. The profile is deeply **nutty**, evoking the **scent of toasted coconut flesh**.

## Usage Note

Roasted Coconut Absolute is inspired by **traditional Thai desserts**, where **coconut is gently toasted** to enhance its natural sweetness. Its **warm, creamy,** and **caramelized aroma** evokes the comforting scent of **coconut candies** and **classic street-market treats**, bringing an **intense rich gourmand note** to any composition.

# TOBACCO (VIRGINIA)

*Nicotiana tabacum*

**ABSOLUTE**

## Extract parts

Flue-cured Leaves

## Olfactory family

Tobacco | Hay | Fruity

## Process

**Solvent** | Solventless SFE | Green Solvent | Enfleurage

## Description

A quintessential "Golden Virginia" profile that is both **honeyed and herbaceous.** It leads with notes of **sun-dried hay and dry grass,** evolving into a rich heart of **stewed prunes and dried apricots**. A clean, sweet tobacco finish that avoids the harshness of darker varieties.

## Usage Note

Virginian Tobacco Absolute is crafted in Lanna, Northern Thailand, from only the **finest hand-selected leaves**. Traditionally Flue-cured and aged, these premium leaves reveal a **smooth, warm**, and **gently sweet aroma.** Long appreciated for its **soothing and comforting qualities,** this tobacco absolute brings **a sense of calm and depth,** evoking the **serene heritage of Northern Thai tobacco farming.**

# YA DONG ACCORD
*Thai Traditional Herbal Blend*

**ABSOLUTE**

**R&D**

## Extract parts

Roots, Barks, Herbs, Spices

## Olfactory family

Medicinal | Camphorous | Deep Woods

## Process

Solvent | Solventless SFE | **Green Solvent** | Enfleurage

## Description

This is a powerhouse aroma, pulling in four directions at once. It leads with a sharp, **medicinal pungency** and **camphorous warmth** from Thai Black Ginger. The heart is dominated by bitter, **resinous barks** and **earthy undergrowth** roots, creating a scent that feels "red" and vibrating. The drydown is exceptionally woody and balsamic, reminiscent of an ancient Siamese apothecary — the most restless, unresolved position in the whole collection.

## Usage Note

Ya Dong refers to **traditional Thai herbal liquors** made by **infusing roots, barks, and spices in local rice alcohol**. Once believed to hold medicinal and aphrodisiac properties, it remains a **cultural staple** in rural Thailand. Our absolute is inspired by these macerations, made from a selection of Thai botanicals, offering perfumers a **spicy, liquor-like signature** with **strong identity and depth.**

# Gardenia
*Gardenia jasminoides*

**ABSOLUTE**

**IFRA ✓**

## Extract parts

Fresh Flowers

## Olfactory family

White Floral | Green

## Process

Solvent | Solventless SFE | Green Solvent | Enfleurage

## Description

A rich, multi-faceted floral that bridges the gap between white flowers and narcotics. It exhibits a **deep jasminic character** enriched by **balsamic and cinnamic warmth**. A bold green opening evokes the r**aw, earthy crispness of Narcissus absolute**, while the heart softens into a **powdery violet and white floral bouquet.**

## Usage Note

In the Lanna culture, Cape Jasmine is a popular choice to be grown in household gardens due to its **auspicious symbolism.** The white color of the Gardenia flower represents **purity of mind,** while its sweet fragrance symbolizes **the fragrance of morality**. For these reasons, Lanna people often offer Gardenia flowers as a form of **Buddhist worship**. Nowadays, it is common for locals to harvest the flowers in the morning and sell them at local morning markets.

# LEMMON MARIGOLD
*Tagetes lemmonii*

**ABSOLUTE**

**EXCLUSIVE**

## Extract parts

Whole plant

## Olfactory family

Citrus | Green | Fruity

## Process

Solvent | Solventless SFE | **Green Solvent** | Enfleurage

## Description

Lemmon Marigold is an **intensely citrus**, **herbal-green** absolute, with a wild **passion fruit brightness** that sits somewhere between a zest and a flower. This dual identity — **sharp and citrusy** on one side, **soft and fruity** on the other — gives it a vibrating, naturalistic lift that nothing synthetic gets close to.

## Usage Note

Tagetes lemmonii grows **abundantly** in gardens and **tea plantations** around Chiang Mai. While most tagetes materials used in perfumery come from Tagetes minuta, distilled for its sharp, ketonic green-apple character, our absolute is extracted from the fresh flowering plant through **renewable solvent** extraction, offering perfumers a **softer**, more **fruity expression** of the tagetes family, ideal for naturalistic **green-floral and citrus accords**.

**Solvent** | Solventless SFE | Green Solvent | Enfleurage

## Description

A juicy, **fermented-tropical opening**, ripe pineapple and mango pushed through a slightly boozy, **macerated edge**, gives way to a **floral green** heart with a **terpenic lift**. Where the catalogue's other fruit notes stay clean, this one keeps the specific character of fruit just starting to turn: sweet, alive, and not entirely stable.

## Usage Note

Makiang is an evergreen tree native to Northern Thailand, found scattered through village gardens in Chiang Mai, Chiang Rai, Lamphun, Lampang, and Mae Hong Son. Its tart, deep-purple fruit has long been pressed into jam, wine, and jelly. This absolute is extracted from the pulp left behind after the fruit is pressed for juice — a byproduct upcycled rather than discarded, in the same spirit as the catalogue's other reclaimed materials (Teak Wood, Tangerine peels).

# MANDARIN PEELS UPCYCLED

*Citrus reticulata Blanco*

**ABSOLUTE**

**IFRA ✓**

## Extract parts

- Fresh Peels

## Olfactory family

- Citrus
- Marine

## Process

- Solvent
- Solventless SFE
- Green Solvent
- Enfleurage

## Description

A **vibrant, tangy-sweet mandarin** expression with a **contemporary twist**. Beyond the **zesty**, **fresh citrus peel**, it reveals a surprising **saline/seaweed undertone**, offering a unique **"oceanic citrus" effect** that adds **salt-crusted depth** to the top notes.

## Usage Note

This absolute is extracted from **upcycled peels of the Thai Tangerine** species **“Sai Nam Pueng”**. Its powerful notes recall freshly broken peels, combined with strong juicy facets, for an authentic experience of this Northern Thai mandarine.

# POMELO FLOWER
*Citrus maxima*

**ABSOLUTE**

## Extract parts

Fresh Flowers

## Olfactory family

Floral | Citrus | Neroli

## Process

Solvent | Solventless SFE | Green Solvent | Enfleurage

## Description

A contemporary, **sparkling interpretation of Neroli**. It is simultaneously **soft and powerful**, radiating an **immaculate white light**. This absolute is prized for its effervescent, **"pétillante" quality**, offering a modern, **cloud-like lightness** that is more diffusive than traditional orange blossom.

## Usage Note

In Thailand, the Pomelo (known locally as Som-O) is revered as **more than just a fruit**; it is a **symbol of abundance, prosperity, and spiritual purity**. While the fruit is a culinary staple, the flowers (known as dok Som-O) hold a **special place in traditional Thai life**, from ancient beauty secrets to sacred rituals.

# SARAPHI
*Mammea siamensis*

**ABSOLUTE**

**EXCLUSIVE**

## Extract parts

Fresh Flower

## Olfactory family

Floral | Violet | Orris | Powdery | Wood | Dry Fruit

## Process

Solvent | Solventless SFE | Green Solvent | Enfleurage

## Description

Saraphi is a refined **floral absolute from Northern Thailand**, combining a **violet-like brightness** with an **orris-style powdery softness**. The heart becomes **elegantly woody**, with a **subtle dry-fruit nuance** that adds depth and texture. A rare seasonal material with a distinctive, **sophisticated profile**.

## Usage Note

Saraphi is a perennial tree of medium to large size, about 12 to 20 meters tall. The white flowers are fragrant. Saraphi is **native to Southeast Asia**. In Thailand Saraphi flowers can often be found in mixed forests and evergreen forests in the northern region. During the Songkran festival, northern people like to use dried Saraphi flowers to make Sompoi water. It is believed to be **holy water used to bathe Buddha statues**.

# WHITE LOTUS
*Nelumbo nucifera*

**ABSOLUTE**

## Extract parts

Fresh Flowers

## Olfactory family

Solaire | Aromatic | Floral

## Process

Solvent | Solventless SFE | Green Solvent | Enfleurage

## Description

A **mystic floral** that balances **airy white transparency** with unexpected depth. It opens with an **aquatic freshness** and **creamy frangipani**, but develops a **fascinating leathery** and **smoky texture**. Aromatic, thyme-like facets provide a **crisp, herbal counterpoint** to its **solaire, pomade-like softness.**

## Usage Note

Our White Lotus Absolute is crafted from **fresh flowers grown in Northern Thailand**. This **double lotus** is revered in Lanna culture for its symbolism. The pristine white petals represent **purity and spiritual clarity**, while its complex floral scent is said to **calm the mind** during **meditation** and **religious ceremonies**. Today, it's still used in **wellness blends and temple offerings**, a fragrant reminder of **inner peace** and **traditional Thai heritage.**
